

XM Radio is the best thing to happen in years. Their programming is outstanding and I really do appreciate the recently added traffic and weather reports. It makes my trip into the Philadelphia metro area so much more convenient. The traffic information is instantaneous and accurate. I pay for XM radio because I have become totally disenchanted with the regular programming on both AM and FM. Please don't restrict this service in any way. It's well worth the money I spend for it each month. Please reject the NAB's petition 04-160.
Thank you.
